

**Global Thermoformers** prides itself as one of the leaders in the development and manufacturing of thermoforming machines. We provide the latest technology and equipment allowing us to give our customers the best service possible on-site and through other media.

**Global Thermoformers** brings to you the finest in thermoforming machines and equipments technology with specialization in packaging solutions. The company manufactures a wide range of thermoforming machines for thin wall / thick wall application, plastic packaging & compact sheet line extruder machinery.

**Global Thermoformers** USP lies in manufacturing – range of impeccable world class quality machines for plastic disposable industry, packing industry, fast moving consumable goods & items catering to the needs of virtually all the industry and establishments.

## **GLOBAL THERMOFORMERS** *Complete Thermoforming Solutions*

**Plot No. 127, S.M.I.E, Near Mujeser Railway Crossing,

# GLOBAL THERMOFORMERS

## Automatic Thermoforming Machine

Automatic Thermoforming machine developed by Global Thermoformers to form disposable containers from 50ml to 300 ml. Raw material like HIPS, PET, PVC can be used to form disposable glasses & any type of deep containers. Infrared ceramic heaters are used for pressure forming. Average speed of production is 1800 cycles /hour.

## Automatic Vacuum Forming Machine

Automatic Vacuum forming machine is low power consumption machine and it can produce plastic blister and other plastic item in different shapes and average speed of this machine is 800 cycles / hour. It is fully automatic machine. Following materials can be used – PVC, HIPS, LDPE, PET.

Size - 450 mm X 600 mm

## Double Skin Packing and Blister Forming Machine

This robust construction heavy duty machine is suitable for Skin Packing, Blister Forming & Shallow Receptacle / Vessel. The forming areas varies from 6"X 8" (150mm X 200 mm) to 24"X 24" (500mm X 600mm) with a maximum forming depth up to 6" (150mm). The machine also has facilities for Auto Cycle, Auto Clamping, Auto Ejection, Heat Zone Control with Plug Assist, Double side heating as optional.

## Shrink Wrapping Machine

This versatile machine is suitable for pilfer proof, tamper evident all round Packing for unit as well as bulk packaging. Four standard models are available with L-Sealer, Web Sealer and collator to suit requirement of customer. Variable speed conveyer drive and electronic temperature controller provides excellent Shrink packing. As per customers requirement L-Sealers, web Sealers and collators are also provided. Neck bending and shrink labeling facilities are also available.

## Automatic Special Purpose Forming Machine

This machine can form large sized items and applications limited by ones own imagination. Items like interiors for luxury buses and aircrafts, liners for refrigerators, AC, Suitcases, Brief Cases, bath Cabinets, Tubs, Deep Sinks and other sanitary ware. Auto cycle, pre blow, plug assist facility is also available.

Size - 700 mm X 800 mm

## Roller Cutting Machine

This versatile high production machine is used for Trimming, Shaping of skin packed and vacuum formed items, using simple and straight steel blades uniformity. It can also be used for cutting rubber, paper leather up to a thickness of 2.5 mm. This machine may be operated either manually or by an electric device.

## Moulds & Dies

Our in house tooling facility helps us deliver customized solutions to every customer. Our current design systems used are AutoCAD and the advanced system Pro Engineering 3D, which gives us the leverage of producing accurate shapes and sizes.
